Student Success Stories

These testimonials are just a glimpse of the many success stories that have emerged from our institute. We are committed to nurturing talent, honing skills, and helping students reach their career aspirations.

Kalpesh Lambade

Full Stack Developer

Awdiz helped me shape my career with their excellent coaching and placement system. They did their best while I did mine while developing many clones Instagram clone, E-commerce Website etc...

Rakesh Daseri

Full Stack Developer

A Simple Google review got me a job! Google Recommended me Awdiz, and then I called for a Demo lecture, after which I was satisfied and decided to pursue my Full Stack development at Awdiz...

Akshata Shinde

Full Stack Developer

I was Empowered by this course! It helped my crack a 9 LPA and I was overwhelmed with emotions. My experience at Awdiz was very Enriching I would recommend it to my fellow Juniors...

Pooja Vetal

Full Stack Developer

Being from a Non-Technical background & getting placed in a Top IT company Company was surreal experience for me. Awdiz helped me achieve this with their excellent placement support services...

And Many More...

- Interaction Design, Wireframing and Responsive Design

Projects

Program Curriculum

Understanding the Data Structure and adding life to your designs is the role of this module.

Module 2

JAVASCRIPT

- Introduction to JAVASCRIPT
- Variables, Data types & Operators
- Control Structures & Loops
- Functions, Arrays & Objects
- DOM Manipulation
- Error Handling
- Prototypes Modules & ES6
- AJAX
- Local storage & Session
- jQuery Effects & Methods.

Module 3

Python

- Introduction to Python
- Operators in Python
- Conditional Statement & Loops
- Function and Modules
- OOPS in python

Projects

Project 4

Building a Responsive Website

Tools   

Project 5

Building Personal Project

Tools 

Program Curriculum

Stay on the top with the most in demand skill of the Industry, React, Angular assures great opportunities!

Module 4

NODE JS

- Introduction to Node.js
- Exploring the Node Package Manager
- Asynchronous Programming in Node
- Managing User Interactivity

Module 5

REACT JS

- Introduction to React
- Setup React js Environment
- Overview of JSX
- Hooks
- Forms and UI
- Components & Life cycle
- Event Handling
- Styles
- Router
- Flux & Redux

Projects

Project 6

Building a Real Time Application

Tools

Program Curriculum

Backend development is as important as front end, and also the final step in your journey to be a Full Stack Developer!

Module 6

Angular

- Introduction to Typescript
- Angular basics
- Building Our First App
- SPA and Routing
- Exploring Single Page Application capabilities
- Angular forms
- Supporting Server Data Persistence
- Angular and server interactions
- Angular Directives in Depth

Projects

Project 7

Building & Deployment of a Personal Project

Tools

Program Curriculum

Backend development is as important as front end, and also the final step in your journey to be a Full Stack Developer!

Module 7

Logic Building using Flowcharts and Pseudocode

- Introduction to Flowcharts and Pseudocodes
- Operators and Data Types
- Decision making and Control Statements
- Implement iterative processes using Loops
- Solve problems using flowcharts and pseudocode

Module 8

Implementing OOPS using Java

- Identify the features of object orientation
- Use decision-making constructs and loop constructs
- Implement collection frameworks
- Inheritance and Polymorphism
- Implement error handling
- Create object-oriented Java applications

Module 9

Database Management using SQL

- Retrieve, summarize, and group data
- Use functions to customize the result set
- Query data by using joins and subqueries
- Manage databases, tables, and result sets
- Manipulate data by using DML statements
- Create and manage indexes and views

Program Curriculum

Backend development is as important as front end, and also the final step in your journey to be a Full Stack Developer!

Module 10

Building GUI Applications using Java

- Programming GUI with Swing
- AWT Event-Handling
- Validations using Regular Expressions
- Implement multi-threading
- File IO and NIO in Java
- JDBC Application Building using SQL

Module 11

Software Development Methodology – Agile Model

- Software Development Models: Traditional Models
- Agile Model and Practices

Projects

Project 8

Building & Deployment of a Desktop Application Project

Tools

Program Curriculum

Backend development is as important as front end, and also the final step in your journey to be a Full Stack Developer!

Module 12

Web Development using JSP and Servlets

- Understand HTTP request/response cycle and servlet lifecycle
- Identify services provided by the Web container
- Implement the MVC design pattern
- Implement servlet request dispatcher, filters, and servlet listeners
- Handle errors and exceptions
- Develop JSP pages using EL and JSTL
- Implement JDBC
- Create Web applications

Module 13

Hibernate

- Introduction to Hibernate and ORM
- Configuring Hibernate
- Hibernate Mapping Files Setup
- Working with Persistent Objects
- Methods of hibernate
- Hibernate Query Language (HQL)
- Criteria Queries
- Caching

Projects
